

OPERATIONALIZATION OF SALAMA MOBILE APPLICATION

1. The Cyber Command Research, Innovation and Development team has been developing Salama Mobile application that provides end-to-end encrypted messaging, secure file transfer, video and audio calls as well as broadcast news alert within the KDF with features of secure real-time communication.
2. As the development is in completion stage, the App is prepared to transit to the rollout and testing phases within selected DMI and DHQ CIS Pers.
3. Therefore, this Sub branch is requesting the Directorate to write to the DHQ CIS the overview of the Salama Mobile App and a list of selected DHQ CIS Pers to be enrolled in the testing stage of the application.
